# ACKNOWLEDGEMENTS

“For any successful work, it owes to thank many”

First and foremost I would like to thank my Mum and Dad for their constant care and blessings..

No one walks alone & when one is walking on the journey of life just where you start to thank those that joined you, walked beside you & helped you along the way.

Over the years, those that I have met & worked with have continuously urged me to write a book, to share me knowledge & skills on paper & to share my insights together with the secrets to my continual, positive approach to life and all that life throws at us. So at last, here it is.

So, perhaps this book & it's pages will be seen as “thanks” to the tens of thousands of you who have who have helped to make my life what is today.

Hard work, knowledge, dedication & positive attitude all are necessary to do any task successfully but one ingredient which is also very important than others is co-operation & guidance of experts & experienced person.

All the words is lexicon futile & meaningless if I fail to express my sense of regard to my parents & sister for their sacrifices, blessings, prayers, everlasting love & pain & belief in me.

I also want to thanks My Team Manish Jain, Mehul Waghela And my Company **SCSI** for their Continues support.

I solely claim all the responsibility for any shortcomings & limitations in this book.

TIPS AND TRICKS

## How To Find Your Facebook Number or Profile ID.

- Go to facebook.com and log in.
- Click on “Profile” or if you’re using the new version, click on your name.
- The URL now contains something that ends with id=123456789. The number at the end is your profile ID
- Example My Profile ID is  
<http://www.facebook.com/100000287487742>
- ID numbers 1-3 were tests that Mark Zuckerberg used to initially test Facebook; the profile pages no longer exist.
- The first real Facebook user starts at ID #4. It belongs to - you guessed it - Mark Zuckerberg.

## Integrate Facebook Twitter In Gmail?

- 1) Login into Gmail
- 2) To add facebook, twitter in gmail account you have to enable "add URL by gadgets" functionality in gmail from gmail labs.

This screenshot shows the 'Add any gadget by URL' form in Gmail Labs. On the left, there is a yellow box with the text 'Add a gadget by its URL:' and an input field with an 'Add' button. To the right, the title 'Add any gadget by URL by Dan P and Dong C' is displayed next to the '@ MananRockx' profile icon. Below the title, a description states: 'Adds a "Gadgets" tab to Settings, where you'll be able to specify the URL of any gadget. This gadget will show in a box in the left column.' To the right of the description are radio buttons for 'Enable' (selected) and 'Disable', and a 'Send feedback' link.

- 3) When you click on save changes it reloads gmail again now click on setting.

This screenshot shows the 'Gadgets' settings page in Gmail. At the top, a navigation bar includes links for 'General', 'Labels', 'Accounts and Import', 'Filters', 'Forwarding and POP/IMAP', 'Chat', 'Web Clips', 'Labs', and 'Gadgets' (which is highlighted). Below the navigation bar, the page title 'Gadgets' is shown next to the '@ MananRockx' profile icon. The main content area states 'You have no gadgets installed.' Below this, there is a section titled 'Add a gadget by its URL:' with an input field and an 'Add' button. At the bottom, a heads-up note reads: 'Heads-up: If you add a Gadget that uses OpenSocial, it'll have access to your Google public profile and friends list.'

Now From here we can add facebook, twitter into gmail.

If u want add facebook then copy and paste...

## How To Download Facebook In your PC

- 1) Login into Facebook
- 2) Home Dropdown > Account Setting
- 3) On the Account Settings page, right below you will see a link that says – **Download a copy of your Facebook data.**

General Account Settings	
Name	Manan Rockx
Username	http://www.facebook.com/MananRockx
Email	Primary: mananrockx@gmail.com
Password	Updated about 2 months ago.
Networks	No networks.
Language	English (US)
<a href="#">Download a copy of your Facebook data.</a>	

- 4) Click on the large green **Start My Archive** button.

### Download Your Information

Get a copy of what you've shared on Facebook.

Easily download and browse through a personal archive of your Facebook photos, posts and messages. [Learn more](#) about downloading a copy of your information.

[Start My Archive](#)

**What's in your archive?**

- Photos or videos you've shared on Facebook
- Your Wall posts, messages and chat conversations
- Your friends' names and some of their email addresses

(Note: We'll only include email addresses for friends who've allowed this in their account settings.)

**What's not in your archive?**

- Your friends' photos and status updates
- Other people's personal info
- Comments you've made on other people's posts

You can also download an [expanded archive](#) to see more about your account history. [Learn what's included.](#)

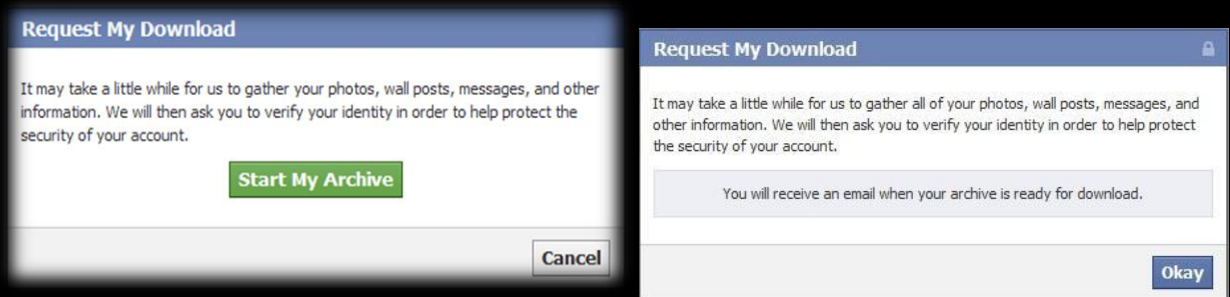

**Caution: Protect your archive**

Your Facebook archive includes sensitive info like your private Wall posts, photos and profile information. Please keep this in mind before storing or sending your archive.

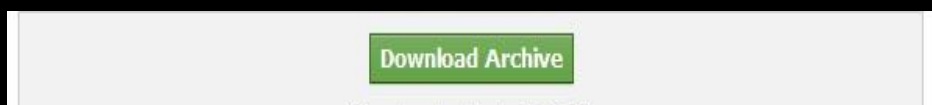

- 5) A small notification pops up that basically says that Facebook will send you the download link to the email address associated with your Facebook account when the backup is ready.

- 6) Facebook starts generating your archive. You can expect to receive a download link in your email account associated with Facebook when the archive is ready for download.
- 7) Click on the link sent to your email, enter your Facebook password

- 8) Click on the Download button to download the backup zip file that has all your Facebook profile data.

## Import Your Blog in Facebook

- 1) If you already keep a blog of your own, you definitely don't want to repeat yourself on every social networking Web site you join. Facebook lets you import your own external blog as notes on your profile, so you can keep your friends up-to-date without repeating yourself.
- 2) Login Facebook
- 3) <http://www.facebook.com/editnotes.php?import>

**Import an External Blog**

You can import posts from one external blog so that they appear along with your notes. Facebook will automatically update your notes whenever you write in your blog. Imported blog posts cannot be edited.

Please only import your own blog. If you import too many blog posts in a day, you could be blocked from writing or importing new notes, and this could result in your account being disabled.

**You are not importing from an external blog to your notes.**  
Enter a URL below to import to your notes.

Web URL:

☐ By entering a URL, you represent that you have the right to permit us to reproduce this content on the Facebook site and that the content is not obscene or illegal.

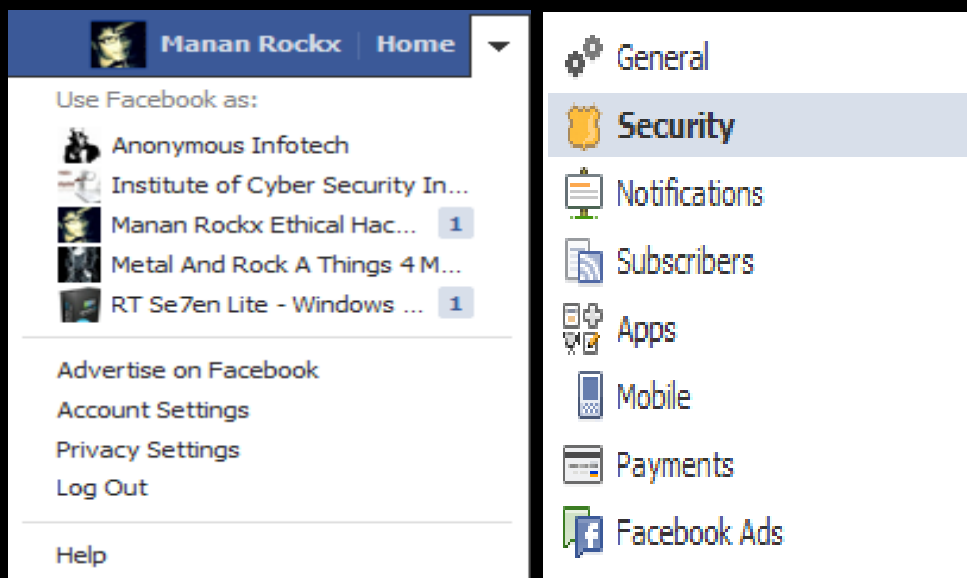

**Start Importing**

- 4) Type in the URL of your blog At the bottom of the preview, click on **“Confirm Import”**
- 5) Your blog is now available to all your Facebook friends whenever you post new articles on your blog, they will automatically appear on your Wall and in your friends.

# How to Change your Name on Facebook Account

1) Login Facebook Click on **Account Settings**.

2) Click **“change”** under the name heading and update your name. You may also add an alternate name (like your nickname) if more people know you by that name.

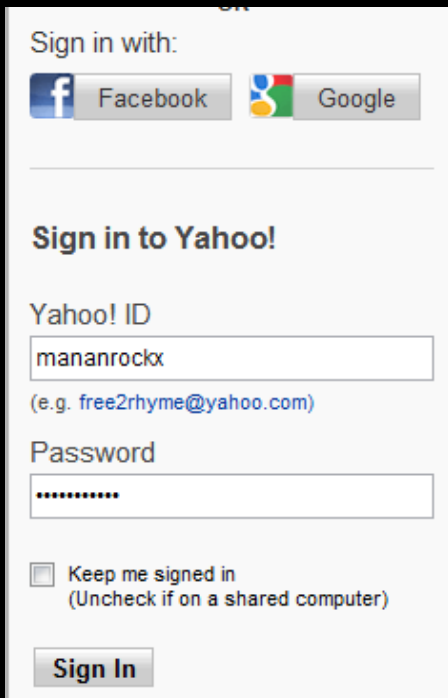

A screenshot of the Facebook name change form. The form is titled "Name" and contains fields for "First:", "Middle:", and "Last:". The "First" field contains "Manan", the "Middle" field contains "Optional", and the "Last" field contains "Rockx". Below these fields is a "Display as:" dropdown menu showing "Manan Rockx". A note states: "We confirm all name changes before they become viewable in your profile. This usually takes 24 hours." Below this note is an "Alternate name:" field containing "Encryption Specialist" with a "[?]" icon. A checkbox labeled "Include this on my profile" is checked. At the bottom, a message says "To save these settings, please enter your Facebook password." followed by a "Password:" field. At the very bottom are "Save Changes" and "Cancel" buttons.

3) However, please note that Facebook will manually verify your name changing request before updating the one mentioned in your profile.

Hello Text [[www.hellotxt.com](http://www.hellotxt.com)]

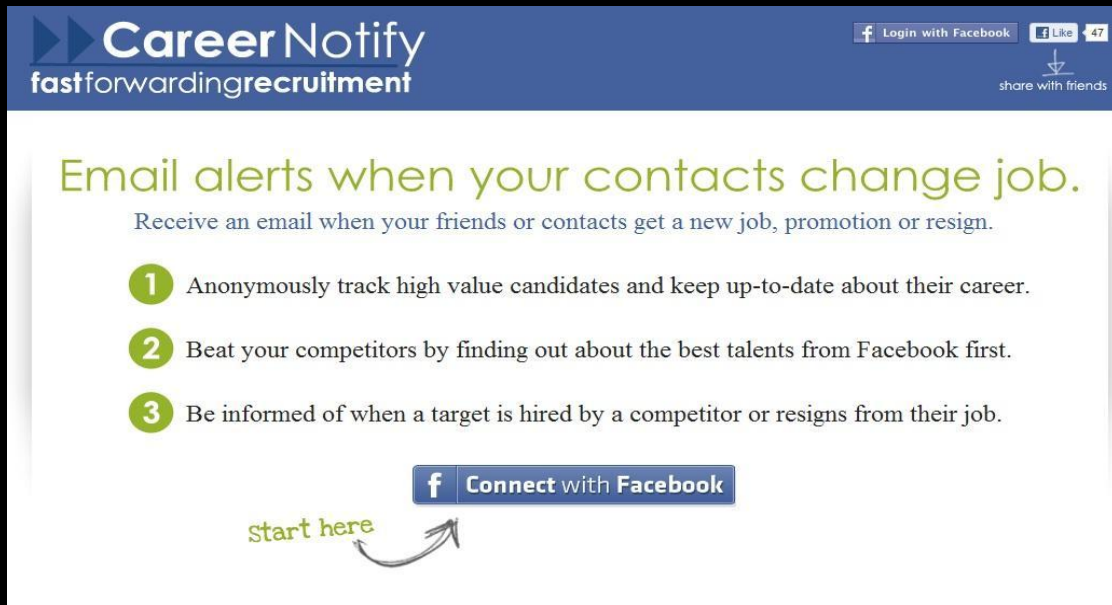

The screenshot shows the Hello Text app interface on a smartphone. The app has a green header with the 'hellotxt' logo. Below the header, there's a large text area with the headline 'All your socials In one place...' and a green button that says 'Get Started - it's Free'. The main content area is divided into four sections: 'Post', 'Doodle', 'My Feed', and 'Networks'. The 'Post' section has a text input field with the placeholder 'What's on your mind?' and a 'Post' button. The 'Doodle' section has a drawing area with a 'Doodle Your Friends' button. The 'My Feed' section shows a list of posts. The 'Networks' section shows a list of social media connections. The app is also available on other platforms, as indicated by the 'Available on iPhone & iPad App Store' and 'ANDROID' logos.

Ping FM [[www.ping.fm](http://www.ping.fm)]

The screenshot shows the Ping FM app interface. At the top, there's a light blue banner with the text 'Post From Anywhere » To Anywhere'. Below this, there are two main sections. The left section is titled 'MOBILE PHONE / SMS / MMS' and shows icons for an iPhone, iPod Touch, and a WAP/SMS interface. It mentions 'iPhone, iPod Touch, WAP and SMS text messaging for US, Canada and Europe.' The right section is titled 'INSTANT MESSAGE / E-MAIL' and shows icons for Yahoo!, iChat, and other messaging services. Below these sections, there's a large area with the text 'Post to all of your favorite services!' and a row of social media icons (Twitter, Facebook, LinkedIn, etc.). A 'MORE »' button is next to the icons. At the bottom, there's a text box that says 'Signup is free. So get crackin!'.

## Facebook Based Web browser

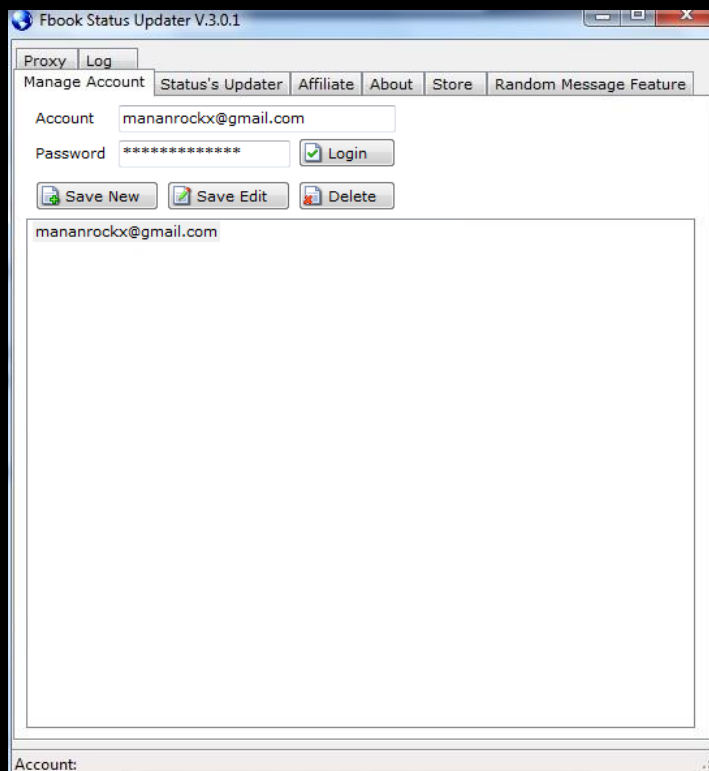

- RockMelt is an open source social media web browser developed by Tim Howes and Eric Vishria. The project is backed by Netscape founder Marc Andreessen. RockMelt integrates a technique for surfing the web that focuses on Google Search and Social Media, in particular Facebook and Twitter.
- RockMelt is based on Google's open-source project Chromium, now on version 14. This is a cross-platform family of browsers (available for Windows, Mac, and Linux) that use the open-source web layout engine Web Kit jointly built by Apple, Google, and the open-source community but have the JavaScript engine replaced by Google's own V8, also open-source

# How to Protect your Facebook Account from hacking.

1. **Enable HTTPS**
2. Click Account Settings > **Account Security**.

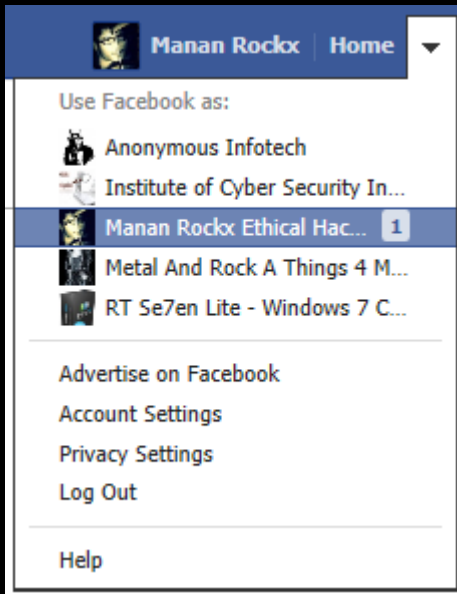

3. Check the box beside Browse Facebook on a secure connection (**https**)  
Whenever possible

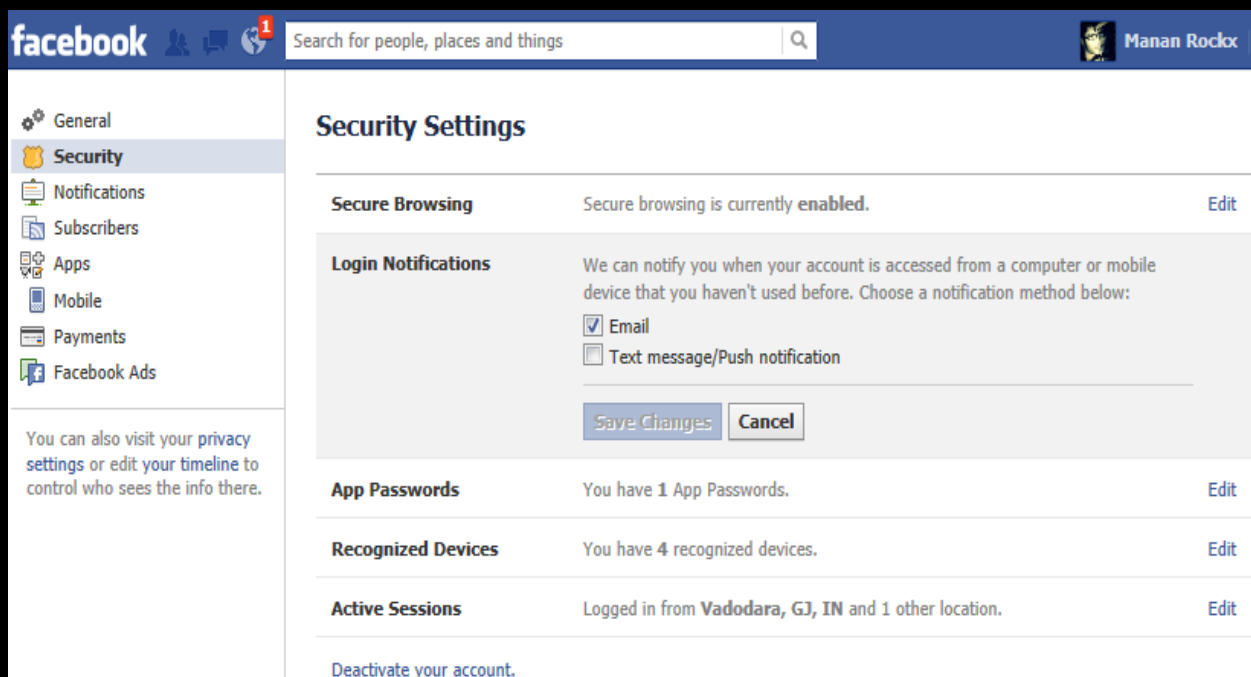

## Enable Login Notification via Email or Massage.

1. **Enable HTTPS For High Security**
2. Click Account Settings > **Account Security**.

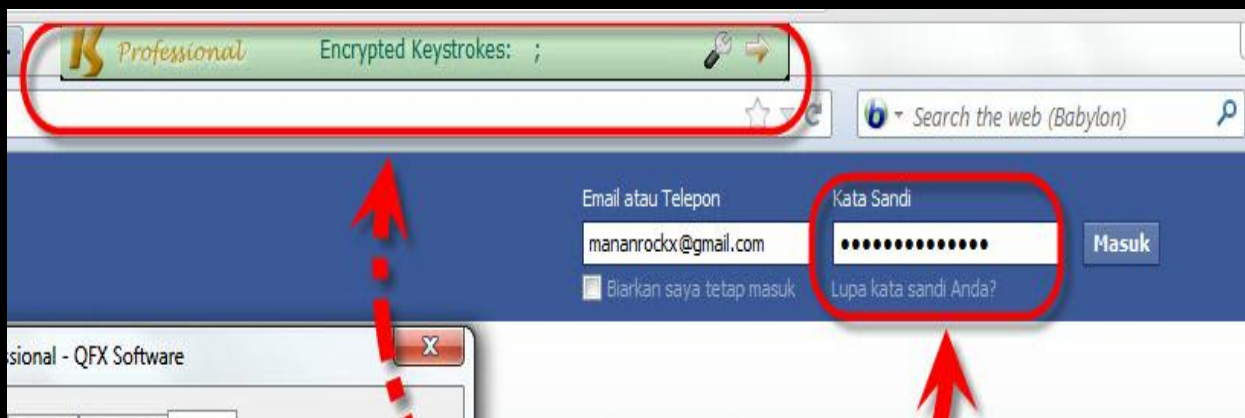

3. Check the box **Login Notification**

## Use Key Scrambler to protect yourself from Key Loggers

Key Loggers are little programs that can even pass through your security software at times. They are a nightmare since they send back all information you type back to the person who wrote the virus. So anytime when you type your password, the hacker would get access to it.

<http://www.qfxsoftware.com>

## How to Protect Your Self from phishing Attack

Facebook phishing Protector

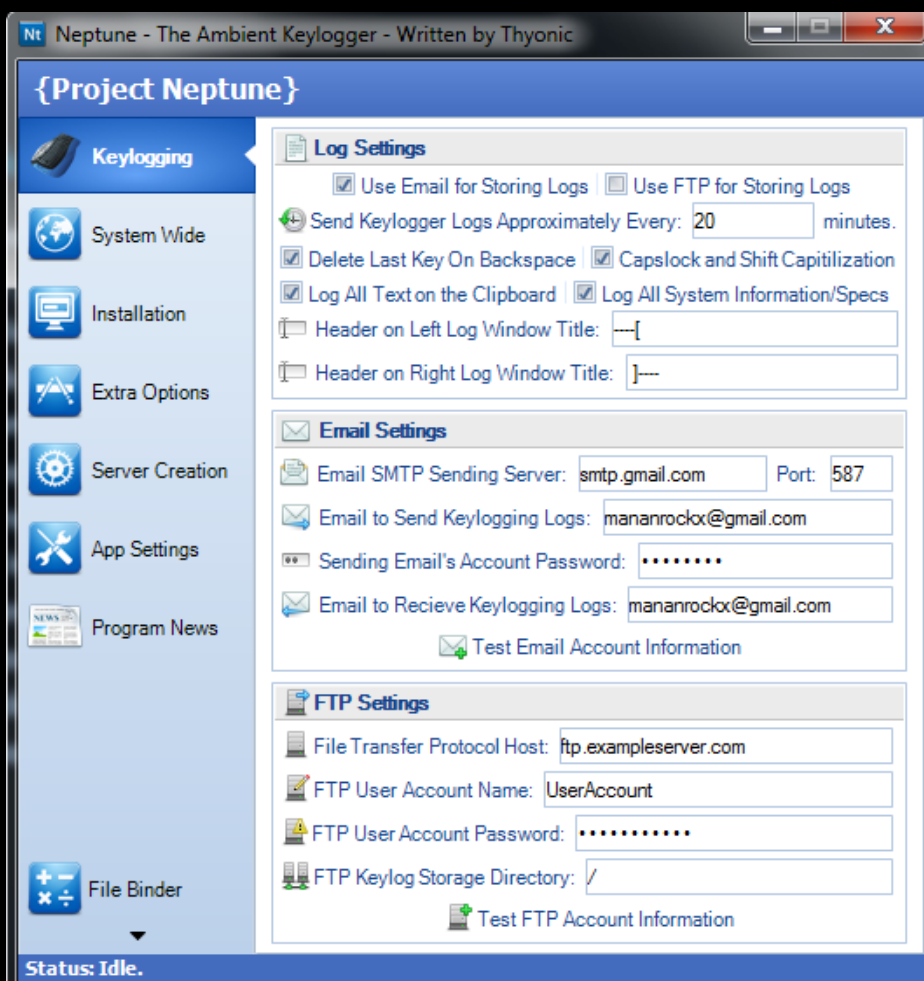

<https://addons.mozilla.org/en-US/firefox/addon/facebook-phishing-protector>

## How to Hack Facebook (Using Key logger)

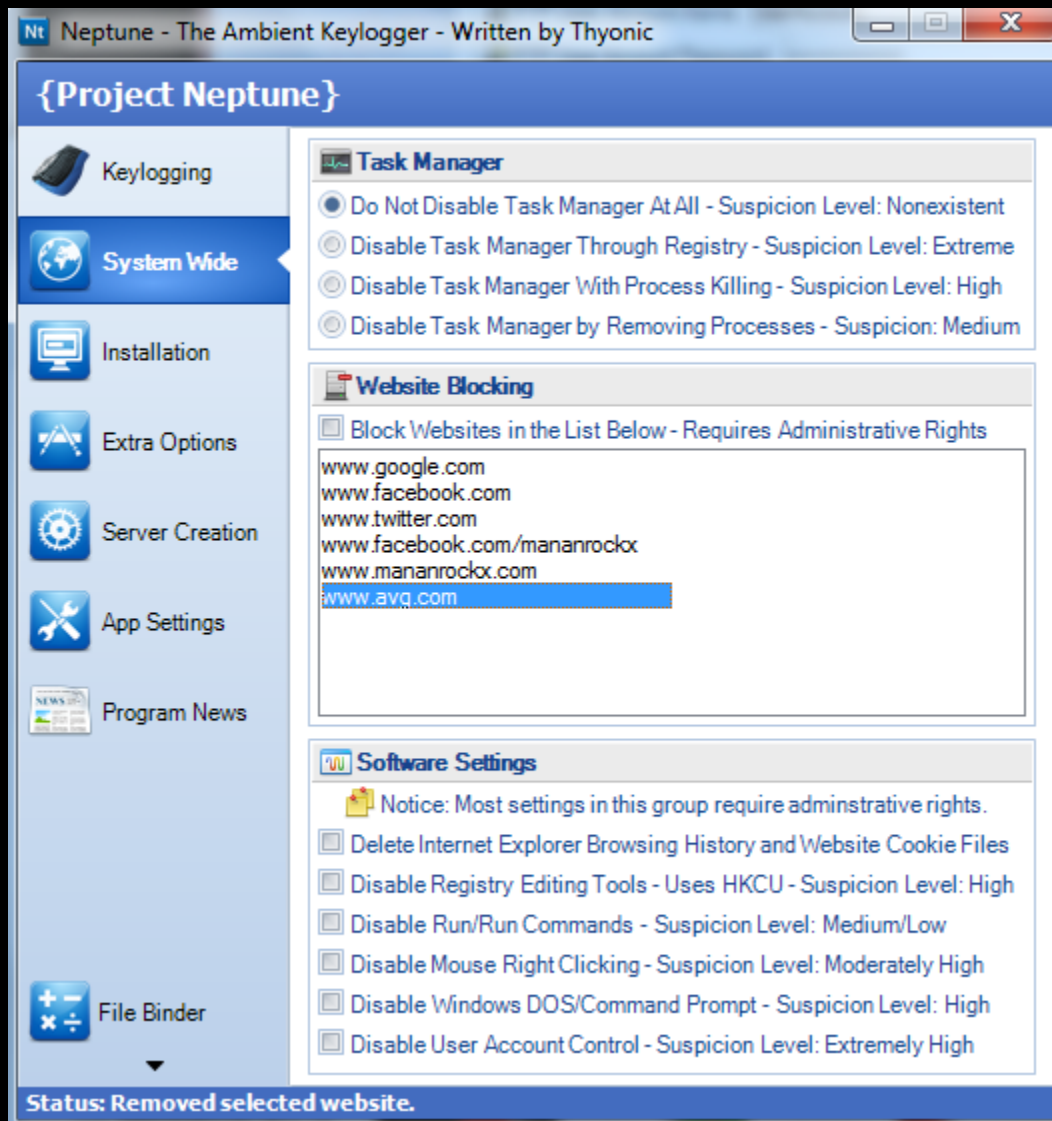

1. First Download Project Neptune Key logger from [goo.gl/qQvOE](http://goo.gl/qQvOE)
2. Open the program
3. Double click on the program where you downloaded it
4. First check the button that says **"Use Email for Storing Logs"** Then change the amount of time the Key logger sends logs.
5. In the Email settings tab keep the **"smtp.gmail.com"** and the port number **587** where it says **"Email to Send Keystroke Logs"** put your email in that box and in the box under that put the password to your email.
6. If you want you can change what email it send the logs too, but otherwise use the same email that you put above.

Then, Click **Test Email Account Information**, and if you get an email saying that it works, then you can move onto the next step.

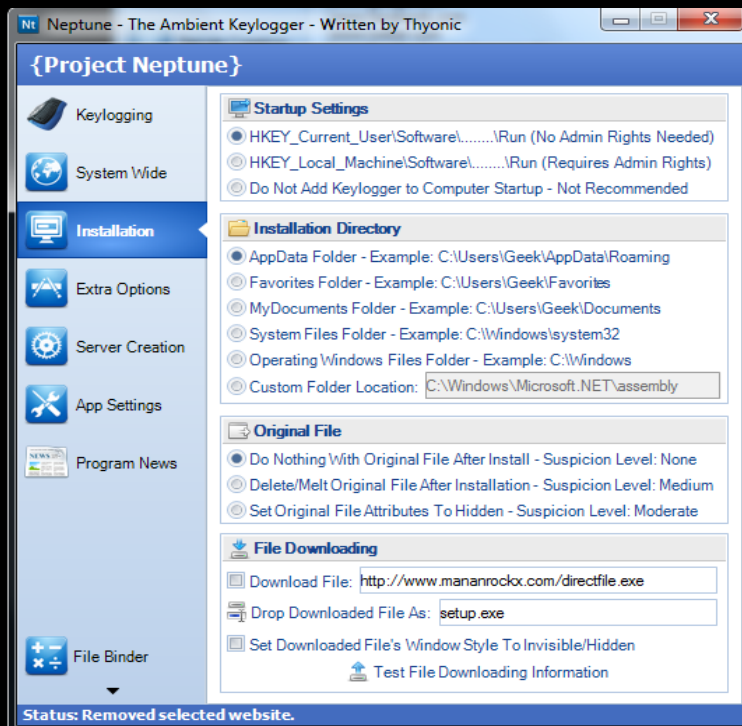

7. Keep all the settings the same, unless you want to disable task manager or block websites now will add some online virus scanning sites to block them this means that the sites can't scan the tool for virus.

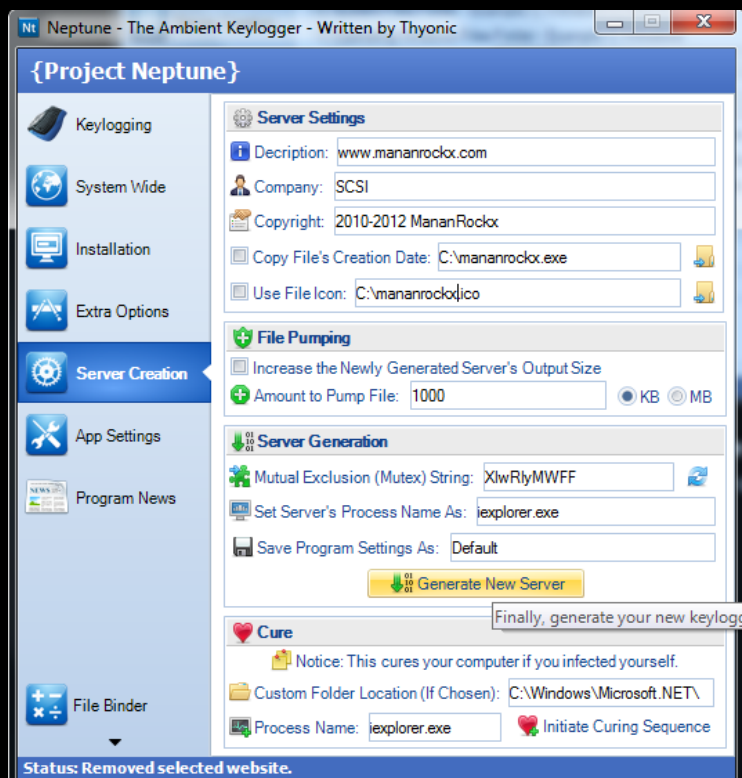

8. Go to the Installation tab and Check the first box in “Startup Setting” Then Choose a place to install in the installation Directory. in The installation Directory I would put it in the **“APP DATA FOLDER”**
9. Then go to **Original File** Check **“Do Nothing with Original File after Install”** to keep suspicion level none. If you want File downloading enabled then type in the link of your exe or other file, but if not then do nothing with this box.

Now go to 'Server Creation' tab and press 'Generate New Server' under 'Server Creation', and give name of your Keylogger and that it... done.

You have successfully created a Keylogger server file. Now, simply send this file to your victim via email, once the victim runs our Keylogger, we will key logs every 20 min via email.
